

SPINOFILL

High Radiopaque Bone Cement
for vertebroplasty

INJECTA

SPINOFILL is a radiopaque, low-viscosity bone cement for filling and stabilizing vertebral bodies. It is obtained by mixing a polymer powder component with a liquid monomer component. After mixing, a low-viscosity dough is obtained which is filled into the vertebral bodies as a stabilization medium and allowed to harden.

Powder contained double-packed bowl

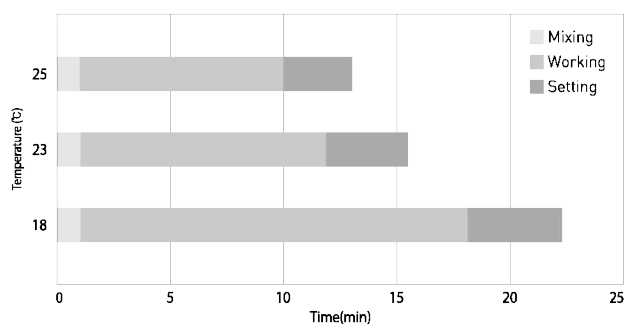

No need to prepare mixing bowl and spatula

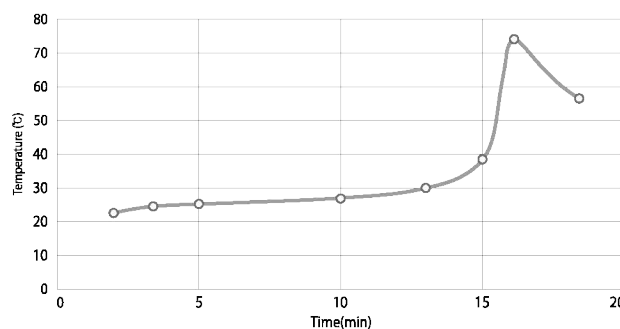

High Radiopaque

Specifications

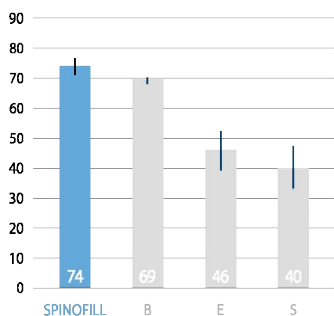

Ideal Setting time

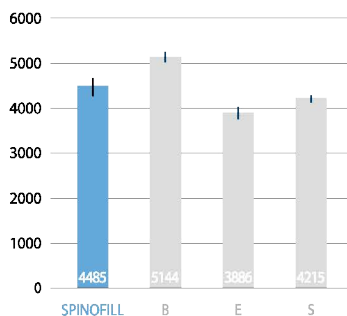

Low Exothermic temperature

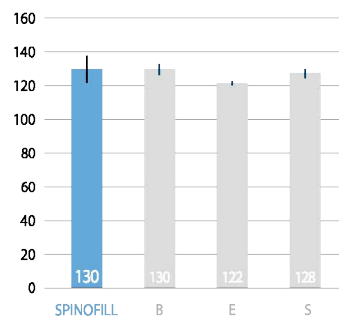

Bending Strength (MPa)

Bending Modulus (MPa)

Compressive strength (MPa)
